IMMEDIATE RESPONSE ITEMS OUTDOOR STOVE

Product Code:MCD-9565

Capacity: 5000 pcs/week

This highly efficient equipment was specifically designed to be used at the disaster zone as a Out Door Stove by the manufacturer. It is a rocket-type solid-fuel stove and has proven its capability by real-life application. This equipment has received special recognition and positive appraisal from AFAD. It is approved and preferred for use in the disaster zone.

This stove was built specially to utilize the wood and wood-based products recovered from the rubble/scrap to be used as fuel. This stove is capable of heating up an area of 60-80m2 outdoors and has only 10% gas emission. Due to its structure, the top of the stove can serve as a base to place cooking materials such as pans, pots, skillets, etc.
